Kicked by a Doc- Tom Davis, a colored man, who has for years been an express driver for the Hecia Coal Co., was kicked on the hand by an old docile horse that seems to have been suddenly possessed of a spirit of pure meanness, one day last week. Tom is still wearing his hand in a sling, and in detailing the account of his injury always declares that "the horse was old enough to know better."

BY W. A. TOOMBS.

The Best Cough Cure

Is Shiloh's Cure. A neglected cough is dangerous. Stop it at once with Shiloh's Cure. For sale by St. Bernard Drug Store.

Bad Marksman- Last Tuesday evening a difficulty occurred at the house of Willis Phillips, between two colored men, named Andy Jefferson and Edward Hawkins, in which Jefferson fired three shots at Hawkins, one of which struck Hawkins in the leg, making a slight wound. It seems that they had a difficulty recently of which little notice was taken, until the evening of the shooting, as Hawkins was leaving the house to go to town, Jefferson ran up within a yard of him and opened a fusillade of random shots and immediately fled. The shooter is from Tennessee, and is doubtless still running towards that portion of God's country.

Scrofula and Nervousness.

"My wife has taken twelve bottles of Hood's Sarsaparilla for scrofula and it has helped her wonderfully. Before she used it she had sores on her neck and was so weak she could not do her house work. She can now do her work and does not suffer with nervous spells as she formerly did." WILLIAM DEAN, Valley Hill, Ky.

Hood's Pills cure biliousness, indigestion.

The Nazaries A good citizen of

Vow, this village, who is also a good

democrat, and formerly was a very

strong partisan, and made a vow

never to shave again until Tilden

and Hendricks were elected. He is

a man of his word, so you may

guess how long his beard has

grown. His good wife wanted

him, on the occasion of the election

of Cleveland and Hendricks, to

shave half of his face in celebra-

tion of the election of one of the

men responsible for his beard.

Well he didn't shave, and since

the last election, his whiskers

surely are safe.

Nerves on Edge.

I was nervous, tired, irritable

and cross. Karl's Clover Root

Tea has made me well and happy.

For sale by St. Bernard Drug

Store.

For Quill-ble Mr. Frank Arnold,

Readers, a well known local

nimrod, brought

in from the Lake last Tuesday, two

birds, one dead and the other

wounded, which local ornithologists

pronounced to be sea gulls.

They were a little larger than a

pigeon, white in plumage, with

dark colored backs, and bills long,

round and very sharp, and they

had webbed feet. The wounded

one was very pugnacious and bit

at every thing that came within

reach. There were four of them,

and Arnold shot these two on the

wing and could have killed them

all easily, as the survivors refused

to leave their unfortunate compan-

ions and their fearless fidelity so

touching the hunter's heart that he

forebore further slaughter.

For the harmony,

And sweet accord was so good music

That the voice to angels was most

like.

—Flower and Leaf.

The first organ recital given at

the Catholic Church, on Sunday

evening last, was well attended

and much enjoyed. The Catholic

congregation are much to be con-

gratulated upon the possession of

this handsome new instrument, and

they appreciate it—beyond more

than the Priest in charge, Rev. A.

M. Coenen. Selections were ren-

dered from Schubert, Beethoven

and Handel. There were also

choruses by the Choir. The duet

by Miss Whalen and Mr. Coenen

was especially good. The organ

has very sweet tone and great vol-

ume.

The music is played mechan-

ically and therefore with exactness,

so that with taste on the part of

the performer in the matter of stop

manipulation the highest class of

music may be artistically rendered.

These recitals will continue at in-

tervals from time to time. Miss

Ellen Whalen was the accompan-

Dig-nified Messrs. Eddie Phillips and Ed- ward Austin, of the No. 11 Mine, laid off a pattern last month for men to dig coal by. Phillips lost five days during the month and his output was 3,500 bushels, which at three cents per bushel, netted him 105 dollars. If there is a nineteen year old boy in the State, who can beat this record, we want him to come right up and occupy the front seat.

Austin is a small man, who would consider himself robust, if he were to weigh 120 pounds.

He lost two days, and put out 3,878 bushels, which panned out to him the sum of \$116.34. When size is considered, we are of the opinion that as a miner, Mr. Austin "takes the rag from the bush," or more classically speak-

ing, removes the mutilated linen from the shrubbery. Now trot out your coal diggers.

Are You Made Miserable by Indigestion, Constipation, Dizziness, Loss of Appetite, Yellow Skin? Shiloh's Vitalizer is a positive cure. For sale by St. Bernard Drug Store.

EDITOR OF THE BEE—

The first quarterly meeting for this conference year was held here the 16 and 17 inst., Rev. D. F. Kerr, Presiding Elder. Quarterly Conference was held Saturday night with a good representation from the general work. Love Feast at 9 a.m., Sunday morning, in which the Gentle Spirit of God gloriously manifested itself. An excellent sermon was preached at 11 a.m., by the Elder, the power and sublimeness of which was felt by the entire congregation. The sacrament of the Lord's Supper was deliberately administered and benediction by Rev. Kerr. We will work and give God the glory.

G. M. BURNETT, P. C.

Knew not His Own. A most laughable circumstance occurred here last week. Mr. John Rule went out to the Company pasture to bring home a calf belonging to him that had passed the summer nipping the herbage that grew luxuriantly in said browsing grounds. Now John can hardly tell a horse from a cow, much less one calf from another, and to the great merriment of the neighbors he led home a calf belonging to Esquire James Head. Flushed with shame and mortification, he went down to explain matters to the "Squire," and to his surprise learned that Head had just returned from the pasture from a search after the calf that Rule had driven away and but for the interference of the pasture keeper, would certainly have driven for his own a fine calf belonging to Mrs. Sarah Atkinson. Head freely forgave Rule, being in the same condemnation and each will cultivate the acquaintance of his own more closely hereafter.

Wreck at Mor- About ten o'clock

tons Gap. Sunday morning,

freight train No.

76, engine No. 374 was wrecked at South end of switch leading into new South Diamond mines at Mortons Gap. The engineer was Dock Stanfield, one of the oldest men on the L. & N., and who drove the Baker's Hill "pusher," for years. The conductor was Ernest Littlepage, a young man, who spent most of his boyhood in Madisonville. The train was northbound, and pulled into Mortons Gap, where Littlepage left his train on main track, and running the engine around train, through siding, coupled on to a caboose with gondolas ahead, which he was to leave in the siding at mines. The switch rod was bent slightly so that switch could not be perfectly thrown. The empty cars and caboose went over all right, but the engine climbed the rail and ran for 30 or 40 yards, displacing the adjacent track the whole distance and burying her drivers half into the road bed between tracks. The engine frame was bent and her right cylinder somewhat damaged. The head brakeman, A. M. McFadden, was thrown from the train by the reversing of the engine and rebound of the train. He had to scramble pretty lively to save his entirety, but was only bruised slightly.

An Important Office.

To properly fill its office and function, it is important that the blood be pure. When it is in such a condition, the body is almost certain to be healthy. A complaint at this time is catarrh in some of its various forms. A slight cold develops the disease in the head. Droppings of corruption passing into the lungs bring on consumption. The only way to cure this disease is to purify the blood. The most obstinate cases of catarrh yield to the medical powers of Hood's Sarsaparilla as if by magic, simply because it reaches the seat of the disease, and by purifying and vitalizing the blood, removes the cause. Not only does Hood's Sarsaparilla do this but it gives renewed vigor to the whole system, making it possible for good health to reign supreme.

Required J. M. Frazer, of Amputation Tennessee, in the employ of the L. & N. R. R. Co., met with a serious accident yesterday morning, which resulted in the amputation of his left foot about five inches above the ankle. He was on the pilot of the engine of train No. 59 in the yards at this place, and, in stepping off, fell and was run over. His foot and ankle were mangled terribly. Railroad surgeon, E. A. Chatten, was assisted at the amputation by Dr. A. W. Jackson. This was Dr. Chatten's first case in the capacity of surgeon for the L. & N. R. R. Co., having but recently been appointed.

A Great German's Prescription.

Diseased blood, constipation, and kidneys, liver and bowel troubles are cured by Karl's Clover Root Tea. For sale by St. Bernard Drug Store.

MADISONVILLE.

Letter List.

The following list of letters remain unclaimed in the Earlington Postoffice, Nov. 18th, 1895. Parties calling for these will please ask for "advertised letters."

Mr. J. B. Atkinson, President of the St. Bernard Coal Co., returned from a visit to the Atlanta Exposition last week, and, of course, while there he took great interest in the display made by the mining interests.

Now we understand that two of our weather prophets disagree on the kind of winter there is before us. One predicts a very cold one and the other a mild one and it all depends upon who is right whether or not we shall have a good season for the miner.

Judging from the following article it would seem that the eastern operators of bituminous coal mines are getting uneasy about the ways the southern miners are making inroads on their coal trade: The meeting of the committee appointed by the bituminous coal mine operators last week, which is to be held in New York is looked forward to with considerable interest. While it is thought that all arrangements cannot be made in one meeting it is presumed that considerable work will be accomplished and that a plan which will meet with the approval of all interested will soon be agreed upon.

For years the bituminous trade has been increasing and at the same time the price received for the coal at the mines has gradually been growing less. This year it has been worse than ever and some blame is laid at the door of the small miner, but he is not the only one that is blamed for the condition of affairs. Most of the operators say that the middle man is responsible for the low price at which bituminous coal has been selling. It is the intention of the operators to adopt such a plan that the different mining districts will be under the supervision of a board of control and each mine operator will be held responsible for his actions.

The main thing to be considered is the amount of coal required for manufacturing and domestic purposes and when this is done there will be no trouble in making the different allotments of tonnage. In 1895, the bituminous tonnage of the United States was 72,621,548 tons. It gradually increased until 1888, when the tonnage amounted to 102,039,838. The next year, 1889, there was a falling off and the tonnage mined was 95,685,543. From that time until 1893, when there were 128,385,231 tons mined, the output was on the increase, but owing to the depression in business and on account of a number of manufacturing establishments being compelled to shut down, the demand for bituminous coal fell off and only 118,820,405 tons were mined. Besides this the strikes had also played a prominent part in curtailing the output.

For years the bituminous mines in the South have been a thorn in the side of the mine operators of Pennsylvania and West Virginia, and no plan could be gotten up which would meet with the approval of the southern operators. Last year these operators made a large cut, which had to be followed by the other miners and the result was that the coal was sold at times at a figure less than it cost to get it out of the mines. These operators have been induced to meet the others and so there is a disposition on the part of all to enter into some agreement for the restoration of rates and maintaining them it is thought that the committee will not have any trouble in perfecting a plan which will be for the benefit of all.

Under the new State administration there will be a Mine Inspector appointed by the Governor and while it is quite natural that politics will have some influence in the selection we believe that if left to both the operators and miners, they would say let him be first measured by his ability to fill the position, regardless of the stand politically he has taken in the past. The lives of thousands of men are at stake and an inferior or incapable man should not secure such a position, and we are of the opinion that many will favor the retention of the present inspector.

How to Prevent Croup.

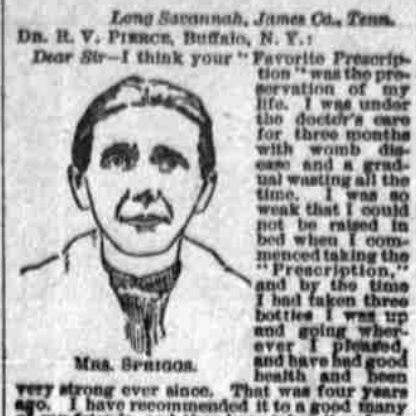

SOME READING THAT WILL PROVE INTERESTING TO YOUNG MOTHERS. HOW TO GUARD AGAINST THE DISEASE.

Croup is a terror to young mothers, and in past times concerning the cause, first symptoms and treatment is the object of this item. The origin of croup is a common cold. Children who are subject to it take cold very easily and croup is almost sure to follow. The first symptom is hoarseness; this is soon followed by a peculiar rough cough, which is easily recognized and will never be forgotten by one who has heard it. The time to act is when the child first becomes hoarse. If Chamberlain's Cough Remedy is freely given all tendency to croup will soon disappear. Even after the croupy cough is developed, it will prevent the attack. There is no danger in giving this remedy, for it contains nothing injurious. For sale by St. Bernard Drug Store, Earlington; Ben T. Robinson, Mortons Gap; George King, St. Charles.

YOUR ORDERS FOR

JOB WORK.

Will receive prompt attention at this office. Estimates furnished upon application.

Long Savannah, James O. Tenn.

Dr. R. V. PIERCE, Buffalo, N. Y.

Dear Sir—I think your "Favorite Prescription" was the prescrip-

tion of my doctor's care for three months with womb disease and a gradual waiting all the time. I was so weak that I could not be raised in bed when I commenced taking the Favorite Prescription, and by the time I had taken three bottles I was up and going well, and I have had good health and been very strong ever since. That was four years ago. I have recommended it to a good many of my friends, and they have taken it and are highly pleased. Yours truly, MRS. BRIDGES.

A. A. SPRIGGS.

PIERCE's CURE

OR MONEY RETURNED.

Down in the Mines.

Our young friend, Will McGary, who has been employed at the Reincke mines as trackman, will soon enter the contest for night policeman at Madisonville, and we wish him success.

Mr. J. B. Atkinson, President of the St. Bernard Coal Co., returned from a visit to the Atlanta Exposition last week, and, of course, while there he took great interest in the display made by the mining interests.

Now we understand that two of our weather prophets disagree on the kind of winter there is before us. One predicts a very cold one and the other a mild one and it all depends upon who is right whether or not we shall have a good season for the miner.

Judging from the following article it would seem that the eastern operators of bituminous coal mines are getting uneasy about the ways the southern miners are making inroads on their coal trade: The meeting of the committee appointed by the bituminous coal mine operators last week, which is to be held in New York is looked forward to with considerable interest. While it is thought that all arrangements cannot be made in one meeting it is presumed that considerable work will be accomplished and that a plan which will meet with the approval of all interested will soon be agreed upon.

For years the bituminous trade has been increasing and at the same time the price received for the coal at the mines has gradually been growing less. This year it has been worse than ever and some blame is laid at the door of the small miner, but he is not the only one that is blamed for the condition of affairs. Most of the operators say that the middle man is responsible for the low price at which bituminous coal has been selling. It is the intention of the operators to adopt such a plan that the different mining districts will be under the supervision of a board of control and each mine operator will be held responsible for his actions.

The main thing to be considered is the amount of coal required for manufacturing and domestic purposes and when this is done there will be no trouble in making the different allotments of tonnage. In 1895, the bituminous tonnage of the United States was 72,621,548 tons. It gradually increased until 1888, when the tonnage amounted to 102,039,838. The next year, 1889, there was a falling off and the tonnage mined was 95,685,543. From that time until 1893, when there were 128,385,231 tons mined, the output was on the increase, but owing to the depression in business and on account of a number of manufacturing establishments being compelled to shut down, the demand for bituminous coal fell off and only 118,820,405 tons were mined. Besides this the strikes had also played a prominent part in curtailing the output.

For years the bituminous mines in the South have been a thorn in the side of the mine operators of Pennsylvania and West Virginia, and no plan could be gotten up which would meet with the approval of the southern operators. Last year these operators made a large cut, which had to be followed by the other miners and the result was that the coal was sold at times at a figure less than it cost to get it out of the mines. These operators have been induced to meet the others and so there is a disposition on the part of all to enter into some agreement for the restoration of rates and maintaining them it is thought that the committee will not have any trouble in perfecting a plan which will be for the benefit of all.
